

SKULLBIKE
“RIDE THAT YOU ALWAYS WISHED FOR”

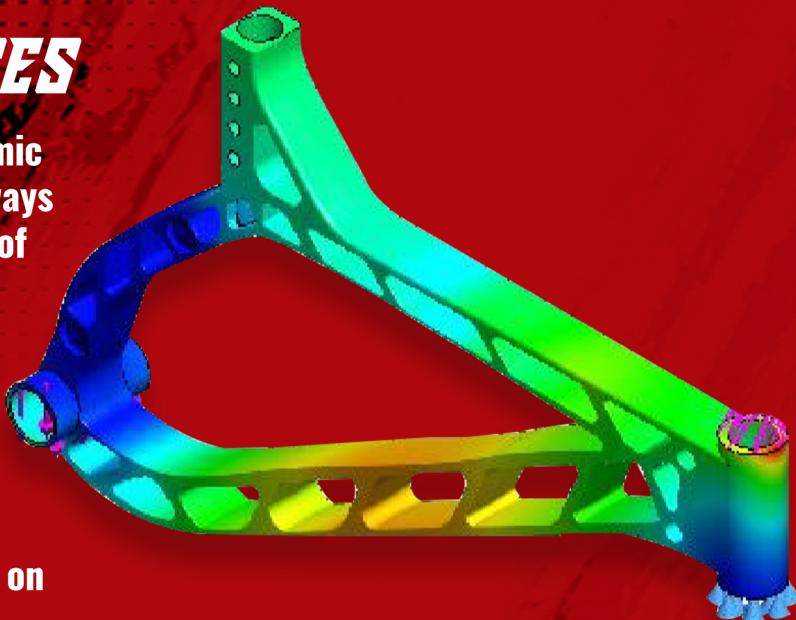

WHY SKULL BIKE?

INNOVATION ADVANTAGES

The Innovation is directly related with economic growth, therefore the design of new bikes always lead to new market campaigns, and increase of sales.

SHAPE ADVANTAGES

The stylish shape of this bike frame has been designed based on the best Downhill bicycles on the market.

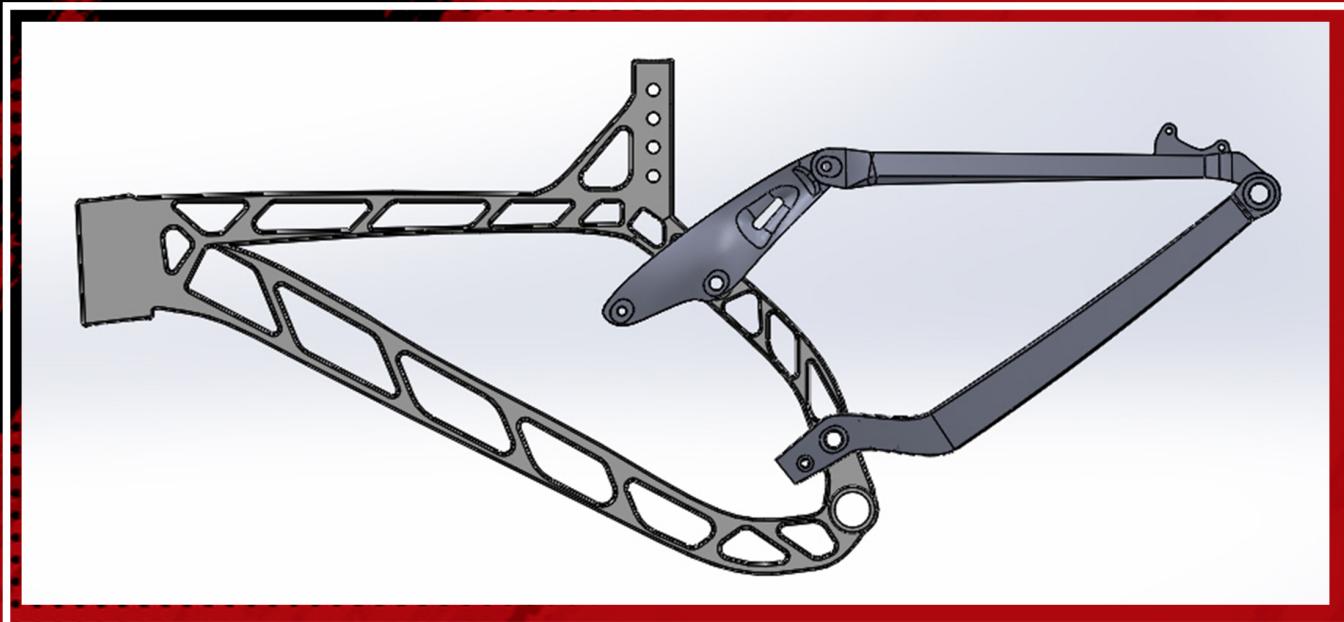

PROVIDER ADVANTAGES

Plenty of providers were found in the Hannover-Messe 2019, therefore it's possible to produce all parts with the best price and quality.

MATERIAL ADVANTAGES

The material used for these parts is casting Aluminum ZL101, which is a much cheaper material than carbon fibers. Because of the material, this bicycle can be easily manufactured in Czech Republic, giving jobs to more people.

PRODUCTION ADVANTAGES

Because of the shape of the parts, the technology used for manufacturing can be the die-casting method which allow to produce parts at very low price, with high production speed.

SPECS

Material	Aluminum
Weight	5.4kg
Usage	Downhill
